ANDERS TECHNOLOGY SERVICES

DISASTER RECOVERY

While we like to think that disasters only happen to others, the reality is that misfortune can strike any company at any time. Equipment can simply fail, and cyber-threats occasionally make it past safeguards. Smart companies stay prepared by having an effective disaster recovery plan in place to avoid the loss of data and revenue and to protect against the theft of sensitive business and client information.

IS THIS YOUR CURRENT SITUATION?

You know having a disaster recovery plan is important, but it never makes it to the top of your to do list. Budgets are tight, and having a disaster recovery site is expensive. You have insurance, but would a claim go through fast enough to prevent your business from coming to a halt? If there was a security breach, network outage, or hardware failure, you're not confident your company is prepared.

THE ANDERS SOLUTION

Using best practices and tested technology, our team is able to provide you with a cost-efficient disaster recovery plan. This plan will mitigate the risks of data loss and theft while simultaneously allowing you to easily access your data. We allow you to have peace of mind and unrestricted performance.

MANAGED SECURITY SERVICES

- Disaster Recovery Consulting and Planning
- Hosted and Cloud-Based Services
- Automated Data Backup Solutions
- Virtualized Server Environments

Partnering with an experienced professional services firm to make informed business decisions is important. The health of your organization depends on it. We understand the technology industry and offer valuable insights on a wide range of issues that impact the growth and visibility of your organization.
